Recycling you can count on...

Note 1- Description

Pete - Polyethylene Terephthalate

PETE or PET is clear, tough, and is the easiest of plastics to recycle. Commonly used in soft drink bottles and many injection molded consumer product containers. Some other types can include both food and non-food containers.

Note 2- Description

HDPE (High Density Polyethylene)

HDPE is used to make bottles for milk, juice, water and laundry products. Due to the fact that HPDE has good chemical resistance, it is used for packing many household and industrial chemicals such as detergents and bleach.

For customers that deserve the best in value and customer service, Maryland Correctional Enterprises has an extensive selection of quality products and services to help your agency or business reach its full potential - all while staying within your budget.
